## NEW DESIGN CARBON ROLLATOR

REHASENSE

**A  
STAR  
IS  
BORN!**

# STARLIGHT PLUS

## TECHNOLOGY THAT SUPPORTS. DESIGN THAT INSPIRES

The new carbon fibre rollator design, developed for indoor and outdoor use, guarantees safety, comfort and style.

With the ultra lightweight STARLIGHT PLUS carbon fibre rollators, Rehasense proves that mobility can combine elegance, comfort and safety. The STARLIGHT PLUS features innovative technical solutions in the areas of safety and ergonomics – both when walking and when sitting.

This ergonomic product respects the user's individual needs and comfort requirements. Height adjustment, backrest attachment, a choice of colour options, and a waterproof, stylish bag combine to create a rollator that will meet the mobility needs of every user.

# 1

## SAFETY AS A PRIORITY

- **New anti-tip accessory:** The mudguards are fitted with special weights. This solution improves the rollator's stability and balance and protects the user from obstacles such as high kerbs or loose stones. Weights keep the rollator firmly anchored to the ground to prevent it from tilting forward.

SUPER-SOFT WHEELS WITH OPTIONAL PROTECTIVE SHIELDS (INTEGRATED WEIGHTS)

- **Innovative band brake system:** Thanks to the integrated wear-free brakes, braking performance remains consistently reliable without the need for regular maintenance or replacement. This technology ensures maximum safety and comfort.

**PAT. PENDING** 

INNOVATIVE, WEAR-RESISTANT BRAKING SYSTEM

- **Larger and super-soft wheels:** The front wheels which are larger than the rear wheels (diameter: 25 cm) make the STARLIGHT PLUS a safe and comfortable companion – even on uneven terrain. In addition, the STARLIGHT PLUS features super-soft tyres – the softest tyres on the market.

- **Reflectors** are an integral part of the rollator's construction and design and are positioned at strategic points on the wheels, the frame and the bag. They increase the user's visibility whilst also contributing to product's modern, functional and stylish design.

# 2

## COMFORT & CONTROL

- **Patented height adjustment of the push handles:** The STARLIGHT PLUS is equipped with an innovative adjustment handle that makes selecting the correct handle height much easier through intuitive operation – especially for people with limited hand function.

**PAT. PENDING** 

- **Generous seat depth and anatomically shaped back strap:** This well-thought-out combination offers excellent support for a well-deserved break on the go. The ergonomically shaped backrest can be secured in the ideal position using simple snap fasteners and adapts perfectly to the contours of the body when seated. The integrated opening in the back strap design improves visibility of the pavement.

- **Handle options:** Thanks to their ergonomic shape, the handles fit comfortably in the hand and support a natural posture whilst walking. There are four different handle styles to choose from in red, black, grey or natural cork, all of which feature a soft material surface for enhanced comfort.

- **Simple folding mechanism** Thanks to the patented 'Click & Safe' mechanism, the rollator can be folded up and locked into place. In this compact and extremely stable form, it can be safely and comfortably carried and loaded into the car without accidentally unlocking.

# 3

## STYLE & FUNCTIONALITY DOWN TO THE LAST DETAIL

- **New carbon fibre design:** The STARLIGHT PLUS features an elegant, 'floating' frame design, crafted from lightweight carbon fibre to ensure it can be manoeuvred effortlessly both indoors and outdoors.

- **Premium bag:** This sleek, premium bag made from high-quality polypropylene combines functionality with elegant design. The waterproof material features an original, carbon look texture, the sophistication of which is further enhanced by subtle metallic details.

- **Adjustable walking stick holder:** The rollator is fitted with a holder for a walking stick. It can be adjusted so that the walking stick is in the optimum position for the user.

# 4

## COLOURS THAT INSPIRE

- **Deep Red Wine:**  
The elegant, deep red shade exudes warmth, style and self-confidence. A colour that combines classic elegance with modern sophistication.

- **Stardust (Glitter Black)** with a touch of sparkle. This glamorous finish lends the stardust a touch of luxury to ensure it stands out from the crowd.

### Handles

4 types available  
– easily interchangeable

**Mudguards** as  
anti-tip accessories

### Rear wheels

200 x 34 mm supersoft  
tyres – the softest  
tyres on the market

## AT A GLANCE

- New carbon fibre design
- Integrated, wear-free braking system
- Replaceable handles
- Deep seat for greater comfort
- Patented easy to adjust handle height for the push handles
- New anti-tip accessory
- Back strap & walking stick holder included
- Premium bag
- Super-soft tyres
- "Click & Safe" locking mechanism

**Prof. Dr Rainer Kamp, MD**, The Dean of Studies and Programme Director for Osteopathy (M.Sc.) at Fresenius University of Applied Sciences, Cologne, highlights the exceptional quality and practicality of this premium rollator. In his statement as a specialist doctor, he emphasises:

*"Particularly noteworthy are the lightweight construction, the ease of folding, the large front wheels, the comfort-oriented tyres and the design focused on stability and safe handling. For geriatric patients and for people with musculoskeletal conditions, a premium lightweight rollator of this kind can be a sensible care option. This applies in particular to people with osteoarthritis of the lower limbs, degenerative spinal conditions, unsteadiness of gait caused by osteoporosis, sarcopenia, reduced physical capacity, post-operative mobility restrictions, an increased risk of falling, and patients with rheumatic conditions."*
